# MICROWAVE HOOD COMBINATION SAFETY

## Your safety and the safety of others are very important.

We have provided many important safety messages in this manual and on your appliance. Always read and obey all safety messages.

This is the safety alert symbol.

This symbol alerts you to potential hazards that can kill or hurt you and others.

All safety messages will follow the safety alert symbol and either the word “DANGER” or “WARNING.”

These words mean:

**⚠ DANGER**

**You can be killed or seriously injured if you don't immediately follow instructions.**

**⚠ WARNING**

**You can be killed or seriously injured if you don't follow instructions.**

All safety messages will tell you what the potential hazard is, tell you how to reduce the chance of injury, and tell you what can happen if the instructions are not followed.

## IMPORTANT SAFETY INSTRUCTIONS

When using electrical appliances basic safety precautions should be followed, including the following:

**WARNING:** To reduce the risk of burns, electric shock, fire, injury to persons, or exposure to excessive microwave energy:

- Read all instructions before using the microwave oven.
- Read and follow the specific “PRECAUTIONS TO AVOID POSSIBLE EXPOSURE TO EXCESSIVE MICROWAVE ENERGY” found in this section.
- The microwave oven must be grounded. Connect only to properly grounded outlet. See “GROUNDING INSTRUCTIONS” found in this section and in the provided Installation Instructions.
- Install or locate the microwave oven only in accordance with the provided Installation Instructions.
- Some products such as whole eggs in the shell and sealed containers – for example, closed glass jars – are able to explode and should not be heated in the microwave oven.
- Use the microwave oven only for its intended use as described in this manual. Do not use corrosive chemicals or vapors in the microwave oven. This type of oven is specifically designed to heat, cook, or dry food. It is not designed for industrial or laboratory use.
- As with any appliance, close supervision is necessary when used by children.
- Do not operate the microwave oven if it has a damaged cord or plug, if it is not working properly, or if it has been damaged or dropped.
- The microwave oven should be serviced only by qualified service personnel. Call an authorized service company for examination, repair, or adjustment.
- See door surface cleaning instructions in the “Microwave Oven Care” section.
- To reduce the risk of fire in the oven cavity:
  - Do not overcook food. Carefully attend the microwave oven when paper, plastic, or other combustible materials are placed inside the oven to facilitate cooking.
  - Remove wire twist-ties from paper or plastic bags before placing bags in oven.
  - If materials inside the oven ignite, keep oven door closed, turn oven off, and disconnect the power cord, or shut off power at the fuse or circuit breaker panel.
  - Do not use the cavity for storage purposes. Do not leave paper products, cooking utensils, or food in the cavity when not in use.
- Liquids, such as water, coffee, or tea are able to be overheated beyond the boiling point without appearing to be boiling. Visible bubbling or boiling when the container is removed from the microwave oven is not always present. **THIS COULD RESULT IN VERY HOT LIQUIDS SUDDENLY BOILING OVER WHEN THE CONTAINER IS DISTURBED OR A SPOON OR OTHER UTENSIL IS INSERTED INTO THE LIQUID.**
  - To reduce the risk of injury to persons:
    - Do not overheat the liquid.
    - Stir the liquid both before and halfway through heating it.
    - Do not use straight-sided containers with narrow necks.
    - After heating, allow the container to stand in the microwave oven for a short time before removing the container.
    - Use extreme care when inserting a spoon or other utensil into the container.
- Oversized foods or oversized metal utensils should not be inserted in the microwave oven as they may create a fire or risk of electric shock.
- Do not clean with metal scouring pads. Pieces can burn off the pad and touch electrical parts involving a risk of electric shock.

**SAVE THESE INSTRUCTIONS**

# IMPORTANT SAFETY INSTRUCTIONS

- Suitable for use above both gas and electric cooking equipment.
- Intended to be used above ranges with maximum width of 36" (91.44 cm).
- Clean Ventilating Hoods Frequently - Grease should not be allowed to accumulate on hood or filter.
- Do not use paper products when appliance is operated in the "PAN BROWN" mode (on models with this feature).
- Do not store any materials, other than manufacturer's recommended accessories, in this oven when not in use.
- Do not store anything directly on top of the microwave oven when the microwave oven is in operation.
- When flambeing foods under the hood, turn the fan on.
- Use care when cleaning the vent-hood filter. Corrosive cleaning agents, such as lye-based oven cleaners, may damage the filter.
- Do not cover or block any openings on the microwave oven.
- Do not store this microwave oven outdoors. Do not use the microwave oven near water - for example, near a kitchen sink, in a wet basement, or near a swimming pool, or similar locations.
- Do not immerse cord or plug in water.
- Keep cord away from heated surfaces.
- Do not let cord hang over edge of table or counter.
- Do not mount over a sink.
- Do not cover racks or any other part of the oven with metal foil. This will cause overheating of the oven.

## SAVE THESE INSTRUCTIONS

# PRECAUTIONS TO AVOID POSSIBLE EXPOSURE TO EXCESSIVE MICROWAVE ENERGY

- (a) Do not attempt to operate this oven with the door open since open-door operation can result in harmful exposure to microwave energy. It is important not to defeat or tamper with the safety interlocks.
- (b) Do not place any object between the oven front face and the door or allow soil or cleaner residue to accumulate on sealing surfaces.
- (c) Do not operate the oven if it is damaged. It is particularly important that the oven door close properly and that there is no damage to the:
  - (1) Door (bent),
  - (2) Hinges and latches (broken or loosened),
  - (3) Door seals and sealing surfaces.
- (d) The oven should not be adjusted or repaired by anyone except properly qualified service personnel.

## Electrical Requirements

### ⚠ WARNING

#### Electrical Shock Hazard

- Plug into a grounded 3 prong outlet.**
- Do not remove ground prong.**
- Do not use an adapter.**
- Do not use an extension cord.**
- Failure to follow these instructions can result in death, fire, or electrical shock.**

Observe all governing codes and ordinances.

#### Required:

- A 120 Volt, 60 Hz, AC only, 15- or 20-amp electrical supply with a fuse or circuit breaker.

#### Recommended:

- A time-delay fuse or time-delay circuit breaker.
- A separate circuit serving only this appliance.

### GROUNDING INSTRUCTIONS

- **For all cord connected appliances:**  
The microwave oven must be grounded. In the event of an electrical short circuit, grounding reduces the risk of electric shock by providing an escape wire for the electric current. The microwave oven is equipped with a cord having a grounding wire with a grounding plug. The plug must be plugged into an outlet that is properly installed and grounded.

**WARNING:** Improper use of the grounding plug can result in a risk of electric shock. Consult a qualified electrician or serviceman if the grounding instructions are not completely understood, or if doubt exists as to whether the microwave oven is properly grounded.

Do not use an extension cord. If the power supply cord is too short, have a qualified electrician or serviceman install an outlet near the microwave oven.

### SAVE THESE INSTRUCTIONS

This device complies with Part 18 of the FCC Rules.

Turntable

## Turntable

- A. Turntable  
B. Hub  
C. Support

The turntable can rotate in either direction to help cook food more evenly. Do not operate the microwave oven without having the turntable in place. See "Assistance or Service" to reorder any of the parts.

### To Install:

1. Remove tape from the hub.
2. Place the support on the microwave oven cavity bottom.
3. Place the turntable on the support.

Fit the raised, curved lines in the center of the turntable bottom between the three spokes of the hub. The rollers on the support should fit inside the turntable bottom ridge.

### Turning Off the Turntable

The turntable can be turned off for manual cooking cycles only. This is helpful when cooking with plates that are larger than the turntable, or when cooking with 2 plates that are side by side.

**To Turn Off:** Touch TURNTABLE ON-OFF. A "turntable off" icon will appear in the display. The turntable will turn back on automatically when cooking is over or CANCEL OFF is touched.

## Cooking Rack

The cooking rack is ideal for two-level cooking. It provides extra cavity space for cooking 2 or more containers at the same time. Insert the rack securely into the rack supports on the side walls of the microwave oven. See "Assistance or Service" section to reorder rack.

- When not using the rack for cooking, remove it from the microwave oven. Damage to the microwave oven could result if someone unintentionally turns it on.
- Rack will become hot. Always use oven mitts or pot holders when handling.
- Do not allow the rack to touch the inside cavity walls, ceiling or floor.
- Use the rack only when cooking on 2 levels.
- Do not use metal cookware, utensils, or a browning dish with the rack.
- Do not let food container on rack touch the top or sides of the microwave oven.
- Remove rack before using Popcorn function.
- Do not cook food directly on the rack. Always use a microwave-safe container.
- The rack is designed specifically for this microwave oven. Do not attempt to use any other rack in this microwave oven.
- Clean rack supports often (see "General Cleaning" section). Damage to the microwave oven could result due to soil buildup.

# MICROWAVE OVEN CONTROL

## Display

When power is first supplied to the microwave oven, a “:” will blink in the display. Touch CANCEL OFF to stop the blinking. If the “:” blinks in the display at any other time, a power failure has occurred. Touch CANCEL OFF and reset the clock if needed. If an invalid value has been entered, the invalid entry tones will sound, and the input prompt will reappear in the display. Retry your entry.

When the microwave oven is in use, the display shows cooking power, quantities, weights and/or prompts. When the microwave oven is not in use (standby mode), the display shows the time of day or Timer countdown.

The speed of the scrolling text may be adjusted, if necessary.

### To Adjust Scroll Speed:

1. Touch and hold CLOCK for 3 seconds until 2 tones sound.
2. Touch number pad “1” for SLOW, “2” for NORMAL or “3” for FAST.
3. Touch START to complete the adjustment.

## Start

The START pad begins any function. If it is not touched within 5 seconds after touching a pad, “PRESS START” will scroll in the display as a reminder. If START pad is not touched within 2 minutes after touching a pad, the display will return to the time of day mode and the programmed function will be canceled.

If cooking is interrupted by opening the door, touching START will resume the preset cycle.

## Cancel Off

The CANCEL OFF pad stops most functions except for the Control Lock and Demo Mode.

The microwave oven will also turn off when the door is opened. Close the door and touch START to resume the cycle.

## Add 30 Seconds

The ADD 30 SEC control automatically starts the microwave oven at 100% power for 30 seconds, and adds 30 seconds of cook time, up to 10 minutes, with each additional touch of the control.

Touching ADD 30 SEC during a manual cook cycle will add 30 seconds of cook time at the current cook power.

## Clock

This is a standard 12-hour clock (12:00-11:59) and does not show a.m. or p.m.

### To Set:

The microwave oven and timer must be off.

1. Touch CLOCK.
2. Touch the number pads to set the time of day.
3. Touch CLOCK or START.

### To Remove:

1. Touch CLOCK.
2. Touch 0.
3. Touch CLOCK.

The time will disappear, and “:” will appear on the display.

---

## Tones

Tones are audible signals, indicating the following:

### One tone

- Valid entry (short tone)

### Two tones

- End of timer countdown
- End of stage in multistage cooking
- Control Lock active
- Hidden feature has been entered or exited
- Reminder, repeat each minute after the end-of-cycle tones

### Three tones

- Invalid entry

### Four tones

- End of cycle

**To Turn Off/On Valid Entry Tones:** With the microwave oven in standby mode, touch and hold the number pad “1” for 3 seconds until 2 tones sound. Touch and hold number pad “1” to turn tones back on.

**To Turn Off All Tones (except end-of-timer and hidden feature tones):** With the microwave oven in standby mode, touch and hold the number pad “2” for 3 seconds until 2 tones sound. Touch and hold number pad “2” to turn tones back on.

---

## Timer

The Timer can be set in minutes and seconds, up to 90 minutes, and counts down the set time.

**NOTE:** The Timer does not start or stop the microwave oven.

While the Timer is in use, the microwave oven can also operate. To see the countdown for 10 seconds while the microwave oven is in use, touch TIMER SET/OFF.

### To Set:

1. Touch TIMER SET/OFF.

The TIMER icon will appear in the display.

“ENTER TIME IN MIN AND SEC” will scroll in the display. If no action is taken after 2 minutes, the display will return to the time of day mode.

2. Touch the number pads to set the length of time.

3. Touch TIMER SET/OFF or START.

When the set time ends, “END” will appear in the display, and end-of-timer tones will sound, followed by reminder tones. When reminder tones sound, “END TIMER” appears in the display. If tones are turned off, “OFF TIMER” will appear in the display as a reminder.

Remember, touching CANCEL OFF while a cook function is active in the display will cancel the cook function, not the Timer.

4. Touch TIMER SET/OFF or CANCEL OFF to cancel the Timer when only the Timer is operating.

Touch TIMER SET/OFF when a cook function is also operating to make the Timer countdown active in the display, and then touch CANCEL OFF to cancel the Timer. The cook function will continue to operate.

---

---

## Control Lock

The Control Lock shuts down the control panel pads to prevent unintended use of the microwave oven.

When the control is locked, only the Vent Fan and Light pads will function. If any other control pad is touched, “LOCKED” will appear in the display and the invalid entry tones will sound.

**To Lock/Unlock Control:** The microwave oven must be in standby mode. Touch and hold CANCEL OFF for 3 seconds until 2 tones sound and a padlock icon appears in the display. Repeat to unlock and remove the padlock icon from display.

---

## Vent Fan

The vent (exhaust) fan has 3 speeds: high, medium and low.

To protect the microwave oven, if the temperature from the range or cooktop below the microwave oven gets too hot, the vent fan will automatically turn on at high speed. It may stay on for up to 1 hour to cool the microwave oven. When this occurs, the vent fan cannot be turned off. If the vent fan pad is touched during automatic fan operation, “AUTO FAN IS ON, FAN SPEED WILL REMAIN ON UNTIL HEAT IS NO LONGER SENSED” will scroll in the display as a reminder.

The vent fan is also the cooling fan, and will start at low speed when any cooking function begins. It will remain on until the cooking function ends.

**To Turn Vent Fan On/Off:** Touch VENT FAN pad once for high, twice for medium, 3 times for low or 4 times for off.

---

## Cooktop Light

The cooktop light has 3 settings: high, low and off.

**To Turn Light On/Off:** Touch LIGHT pad once for high, twice for low or 3 times for off.

---

## Demo Mode

The Demo Mode is ideal for learning how to use the microwave oven. When set, functions can be entered without actually turning on the microwave generator (magnetron). The microwave oven light will come on, the fan will run, and the turntable will rotate (if set on).

The DEMO icon will appear in the display while the microwave oven is off, and will flash during any function. After 5 minutes of inactivity, a reminder message will scroll in the display when any control pad is touched.

**To Turn On/Off:** The microwave oven must be in standby mode. Touch and hold the number pad “3” for 3 seconds until 2 tones sound and the DEMO icon appears in the display. Repeat to turn off and remove the DEMO icon from the display.

---

---

# MICROWAVE OVEN USE

---

A magnetron in the oven produces microwaves which reflect off the metal floor, walls and ceiling and pass through the turntable and appropriate cookware to the food. Microwaves are attracted to and absorbed by fat, sugar and water molecules in the food, causing them to move, producing friction and heat which cooks the food.

- Do not lean on or allow children to swing on the microwave oven door.
- Do not operate microwave oven when it is empty.
- The turntable must be in place and correct side up when microwave oven is in use. Do not use if turntable is chipped or broken. See “Assistance or Service” section to reorder.
- Baby bottles and baby food jars should not be heated in microwave oven.
- Clothes, flowers, fruit, herbs, wood, gourds, paper, including brown paper bags and newspaper, should not be dried in microwave oven.
- Do not use the microwave oven for canning, sterilizing or deep frying.
- Paraffin wax will not melt in the microwave oven because it does not absorb microwaves.
- Use oven mitts or pot holders when removing containers from microwave oven.
- Do not overcook potatoes. At the end of the recommended cook time, potatoes should be slightly firm. Let potatoes stand for 5 minutes. They will finish cooking while standing.
- Do not cook or reheat whole eggs inside the shell. Steam buildup in whole eggs may cause them to burst. Cover poached eggs and allow a standing time.

---

## Food Characteristics

When microwave cooking, the amount, size and shape, starting temperature, composition and density of the food affect cooking results.

### Amount of Food

The more food heated at once, the longer the cook time needed. Check for doneness and add small increments of time if necessary.

### Size and Shape

Smaller pieces of food will cook more quickly than larger pieces, and uniformly shaped foods cook more evenly than irregularly shaped food.

### Starting Temperature

Room temperature foods will heat faster than refrigerated foods, and refrigerated foods will heat faster than frozen foods.

### Composition and Density

Foods high in fat and sugar will reach a higher temperature, and will heat faster than other foods. Heavy, dense foods, such as meat and potatoes, require a longer cook time than the same size of a light, porous food, such as cake.

---

## Cooking Guidelines

### Covering

Covering food helps retain moisture, shorten cook time and reduce spattering. Use the lid supplied with cookware. If a lid is not available, wax paper, paper towels or plastic wrap approved for microwave ovens may be used. Plastic wrap should be turned back at one corner to provide an opening to vent steam. Condensation on the door and cavity surfaces is normal during heavy cooking.

### Stirring and Turning

Stirring and turning redistribute heat evenly to avoid overcooking the outer edges of food. Stir from outside to center. If possible, turn food over from bottom to top.

### Arranging

If heating irregularly shaped or different sized foods, arrange the thinner parts and smaller sized items toward the center. If cooking several items of the same size and shape, place them in a ring pattern, leaving the center of the ring empty.

### Piercing

Before heating, use a fork or small knife to pierce or prick foods that have a skin or membrane, such as potatoes, egg yolks, chicken livers, hot dogs, and sausage. Prick in several places to allow steam to vent.

### Shielding

Use small, flat pieces of aluminum foil to shield the thin pieces of irregularly shaped foods, bones and foods such as chicken wings, leg tips and fish tail. See “Aluminum Foil and Metal” first.

### Standing Time

Food will continue to cook by the natural conduction of heat even after the microwave cooking cycle ends. The length of standing time depends on the volume and density of the food.

---

## Cookware and Dinnerware

Cookware and dinnerware must fit on the turntable. Always use oven mitts or pot holders when handling because any dish may become hot from heat transferred from the food. Do not use cookware and dinnerware with gold or silver trim. Use the following chart as a guide, then test before using.

<b>MATERIAL</b>	<b>RECOMMENDATIONS</b>
Aluminum Foil, Metal	See "Aluminum Foil and Metal" section.
Browning Dish	Bottom must be at least 3/16" (5 mm) above the turntable. Follow manufacturer's recommendations.
Ceramic Glass, Glass	Acceptable for use.
China, Earthenware	Follow manufacturer's recommendations.
Melamine	Follow manufacturer's recommendations.
Paper: Towels, Dinnerware, Napkins	Use nonrecycled and those approved by the manufacturer for microwave oven use.
Plastic: Wraps, Bags, Covers, Dinnerware, Containers	Use those approved by the manufacturer for microwave oven use.
Pottery and Clay	Follow manufacturer's recommendations.
Silicone Bakeware	Follow manufacturer's recommendations.
Straw, Wicker, Wooden Containers	Do not use in microwave oven.
Styrofoam <sup>†</sup>	Do not use in microwave oven.
Wax Paper	Acceptable for use.

### To Test Cookware or Dinnerware for Microwave Use:

1. Place cookware or dinnerware in microwave oven with 1 cup (250 mL) of water beside it.
2. Cook at 100% cooking power for 1 minute.

Do not use cookware or dinnerware if it becomes hot and the water stays cool.

---

## Aluminum Foil and Metal

Always use oven mitts or pot holders when removing dishes from the microwave oven.

Aluminum foil and some metal can be used in the microwave oven. If not used properly, arcing (a blue flash of light) can occur and cause damage to the microwave oven.

---

### OK for Use

Racks and bakeware supplied with the microwave oven (on some models), aluminum foil for shielding, and approved meat thermometers may be used with the following guidelines:

- Do not allow aluminum foil or metal to touch the inside cavity walls, ceiling or floor.
- Always use the turntable.
- Do not allow contact with another metal object during microwave cooking.

---

### Do Not Use

Metal cookware and bakeware, gold, silver, pewter, non-approved meat thermometers, skewers, twist ties, foil liners such as sandwich wrappers, staples and objects with gold or silver trim or a metallic glaze should not be used in the microwave oven.

<sup>†</sup>STYROFOAM is a Registered Trademark of The Dow Chemical Company.

---

## Microwave Cooking Power

Many recipes for microwave cooking specify which cooking power to use by percent or name. For example, 70%=Medium-High.

Use the following chart as a general guide for the suggested cooking power of specific foods.

PERCENT/NAME	USE
100%, High (default setting)	Quick heating convenience foods and foods with high water content, such as soups, beverages and most vegetables.
90%	Cooking small, tender pieces of meat, ground meat, poultry pieces and fish fillets. Heating cream soups.
80%	Heating rice, pasta or casseroles. Cooking and heating foods that need a cook power lower than high. For example, whole fish and meat loaf.
70%, Medium-High	Reheating a single serving of food.
60%	Cooking sensitive foods such as cheese and egg dishes, pudding and custards. Cooking non-stirrable casseroles, such as lasagna.
50%, Medium	Cooking ham, whole poultry and pot roasts. Simmering stews.
40%	Melting chocolate. Heating bread, rolls and pastries.
30%, Medium-Low, Defrost	Defrosting bread, fish, meats, poultry and precooked foods.
20%	Softening butter, cheese, and ice cream.
10%, Low	Taking chill out of fruit.

---

## Manual Cooking

**To Change Cook Power:** Touch COOK POWER repeatedly to scroll through the cook power levels. Touch START.

---

## Cooking in Stages (or steps)

The microwave oven can be set for manual cooking at different cooking powers for various lengths of time, up to 3 stages.

### To Cook in Stages:

1. Place food on the turntable and close the door.
2. Touch COOK TIME, then enter length of time to cook for the first stage.  
If cooking with 100% power, skip Step 3.
3. Touch COOK POWER, then enter the desired power level for the first stage. See "Microwave Cooking Power" chart.
4. Repeat steps 2 and 3 for the second and third stages.
5. Touch START.  
The display will count down each of the cook times. The display will switch briefly to "STEP 1," "STEP 2" or "STEP 3" every 30 seconds during their respective stages.

**To Change Cook Time:** Touch COOK TIME. The countdown will freeze for a few seconds. Enter the new cook time and touch START or wait a few seconds for the countdown to resume.

**To Change Cook Power:** Touch COOK POWER repeatedly to scroll through the cook power levels. Touch START.

## Quick Touch Cooking

The Quick Touch menu pads provide convenient access to preset cooking programs for common microwavable foods. Use the following chart as a guide.

FOOD	SERVING SIZE	INSTRUCTIONS
Popcorn*	1.75 oz (50 g) 3 oz (85 g) 3.5 oz (100 g)	Pop only one package at a time. For bag sizes not listed in this section, follow directions on the package.
Beverage	1 or 2, 8 oz (250 mL) cups	Do not cover. The diameter of the cup's opening will affect how the liquid heats. Beverages in cups with smaller openings may heat faster.
Pizza	1 - 3, 3 oz (85 g) slices (refrigerated)	Place on paper towel or paper plate.
Baked Potato	1-4 medium, 10-13 oz (283-369 g) pieces/potatoes, similar in size	Pierce each one several times with a fork. Place 1 potato to the side of turntable, away from the center. Place 2-4 potatoes on turntable around edges, at least 1" (2.5 cm) apart. At the end of cooking, let stand 5 minutes.
Frozen Entrée	10, 20, 40 or 60 oz (283 or 567 g, or 1.1 or 1.7 kg)	Remove from package. Loosen cover on 3 sides. If entrée is not in microwave-safe container, place on plate, cover with plastic wrap and vent. For 10- or 20-oz entrée, let stand 2-3 minutes after cooking. For 40- or 60-oz entrée, remove film halfway through cycle. Let stand 5 minutes after cooking.

\*Do not use regular paper bags or glassware. Do not try to pop unpopped kernels. Use fresh bags of popcorn for optimal results. Cooking results may vary by brand and fat content. If using a microwave popcorn popper, follow manufacturer's instructions. If popcorn volume is less than expected, try placing a microwave-safe dish upside down on the turntable, placing a fresh popcorn bag on the dish, and then starting the cycle.

**NOTE:** The Popcorn times are programmed to run 15 seconds longer than the actual pop time. During this 15-second period, the magnetron is off, and the microwave oven is cooling. This allows the microwave oven to pop another bag of popcorn immediately following the cycle.

### To Use:

1. Touch appropriate Quick Touch pad (see chart, above).
2. Touch pad repeatedly to enter quantity (see chart, above).  
or  
Enter the exact quantity using the number pads.  
Doneness for Beverage, Pizza, Baked Potato or Frozen Entrée may be adjusted at this time by touching COOK TIME.
3. Touch START.  
The display will count down the cook time.  
When the cycle ends, "END" will appear in the display, and the end-of-cycle tones will sound, followed by reminder tones.

4. Touch CANCEL OFF or open the door to clear the display and/or stop reminder tones.

## Doneness

Doneness may be adjusted to more done, less done, or back to normal doneness (default) for all automatic cooking functions except Popcorn. During programming, before touching START, touch COOK TIME once for MORE, twice for LESS or 3 times for NORMAL.

## Preset Cooking

Times and cooking power have been preset for certain microwavable foods. Use the following chart as a guide.

FOOD	PAD	QUANTITY/INSTRUCTIONS

- Unwrap foods and remove lids (for example, from fruit juice containers) before defrosting.
- Shallow packages will defrost more quickly than deep blocks.
- Separate food pieces as soon as possible during or at the end of cycle for more even defrosting.
- Use small pieces of aluminum foil to shield parts of food such as chicken wings, leg tips and fish tails. See "Aluminum Foil and Metal" first.

The Auto Defrost system has 3 categories: Meat, Poultry and Fish. It should not be used for food left outside the freezer more than 20 minutes and frozen ready-made food.

# MICROWAVE OVEN CARE

---

## General Cleaning

**IMPORTANT:** Before cleaning, make sure all controls are off and the microwave oven is cool. Always follow label instructions on cleaning products.

Soap, water and a soft cloth or sponge are suggested unless otherwise noted.

---

### GREASE FILTERS

---

Do not use ammonia or corrosive cleaning agents such as lye-based oven cleaners.

- Hot water and mild detergent:

Soak filters, then scrub and swish to remove embedded dirt and grease. Rinse well and shake to dry.

- Dishwasher:

Wash separately, not with dirty dishes, because food can be trapped in the filters.

**NOTE:** Some discoloration of the filters may occur after cleaning them in the dishwasher. This is normal, and will not affect the performance of the grease filters.

---

### MICROWAVE OVEN CAVITY

---

To avoid damage to the microwave oven cavity, do not use soap-filled scouring pads, abrasive cleaners, steel-wool pads, gritty washcloths or some recycled paper towels.

To avoid damage to stainless steel models, rub in direction of grain.

The area where the microwave oven door and frame touch when closed should be kept clean.

#### Average soil

- Mild, nonabrasive soaps and detergents:

Rinse with clean water and dry with soft, lint-free cloth.

#### Heavy soil

- Mild, nonabrasive soaps and detergents:

Heat 1 cup (250 mL) of water for 2 to 5 minutes in microwave oven. Steam will soften soil. Rinse with clean water and dry with soft, lint-free cloth.

#### Odors

- Lemon juice or vinegar:

Heat 1 cup (250 mL) of water with 1 tbs (15 mL) of either lemon juice or vinegar for 2 to 5 minutes in microwave oven.

#### Microwave Inlet Cover

To avoid arcing and microwave oven damage, the microwave inlet cover (see “Parts and Features”) should be kept clean.

- Wipe with wet cloth.

---

### MICROWAVE OVEN DOOR AND EXTERIOR

---

The area where the microwave oven door and frame touch when closed should be kept clean.

Apply glass cleaner to towel, not directly to surface.

#### Stainless Steel (on some models)

To avoid damage to microwave oven door and exterior, do not use soap-filled scouring pads, abrasive cleaners, steel-wool pads, gritty washcloths or some paper towels. Rub in direction of grain.

- Stainless Steel Cleaner & Polish (not included):

See “Assistance or Service” section to order.

Rinse with clean water and dry with soft, lint-free cloth.

### CONTROL PANEL

---

- Sponge or soft cloth and water:

Dampen sponge with water and wipe panel. Dry with soft cloth.

---

### TURNTABLE

---

Replace turntable immediately after cleaning. Do not operate the microwave oven without the turntable in place.

- Mild cleanser and scouring pad

- Dishwasher

---

### COOKING RACK

---

Dishwasher cleaning is not recommended. Do not use abrasive cleansers or scrubbers.

- Mild cleanser, water and washcloth

---

### RACK SUPPORTS

---

To avoid soil buildup which may lead to arcing and cause damage to the microwave oven, clean rack supports often.

Do not attempt to remove supports from cavity walls.

Do not use soap-filled scouring pads, abrasive cleaners, steel-wool pads, gritty washcloths or some recycled paper towels.

- Mild, nonabrasive soap or detergent and washcloth, toothbrush or cotton swab:

Rinse with clean water and dry with soft, lint-free cloth.
